

Portable Tactical Target Lifter

Technical Specifications:

MECHANICAL

- <1 sec exposure/conceal
- Digital hit sensor with dynamic filtering

ENVIRONMENT

- -30°F to 140°F+ (-35°C to 60°C+)
- IP65 rated or equal. IP67 available.

POWER

- 110V – 240V AC Shore Power
- Rechargeable batteries available

COMMUNICATIONS

- Wireless
- Hardwired

WEIGHT

- Approx. 35 lbs. (16 kg)

DIMENSIONS

- 16" x 18" x 12"
- 40 cm x 45 cm x 30 cm

AVAILABLE UPGRADES

- LOMAH bar
- Mover capable
- Range control software
- Light and sound effects

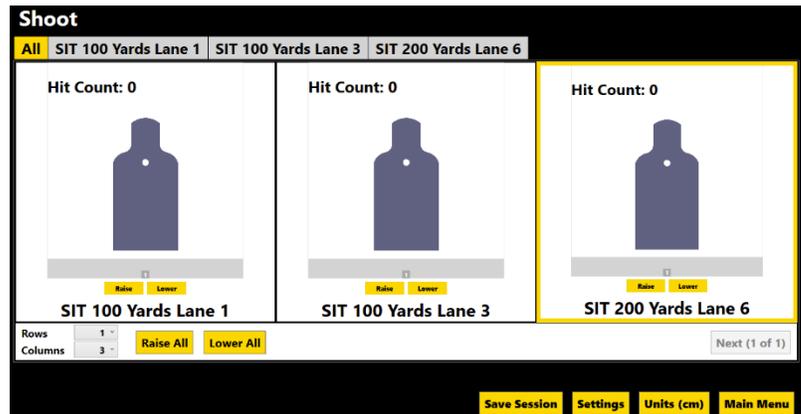

Description

Oakwood Control's Tactical Target Lifter is a man portable pop up target system for live fire training. The system is light weight and robust for field deployable training and can be permanently installed if required. The Plug and Play design makes it easy to set up and program. The TTL uses standard target commands (hit-fall, expose/conceal, up/down) for easy programming in scenario mode.

Expand your range by adding multiple targets to create training scenarios and track your training with our TTL control tablet. Easily upgrade your TTL with LOMAH for true hit or miss location and a more efficient training program.

TTL Control Tablet

Oakwood's TTL Control Tablet works with multiple targets and has a range of 2000m. Using standard target commands for ease of use. Create and save training scenarios and qualification courses. Programmable electronic hit counting and downloadable training data for after training review.
